Emotional Intelligence – E11+E12

Submitted by: Chakshu Shaktawat

Reg. No. 20BCE10376

Question 1: How will you define and rate Mr. Srivastava's emotional intelligence by applying Goleman's model of EI?

As a CEO, Mr. Manohar Srivastava can apply emotional intelligence to achieve self-awareness, objectivity and equality, all in the name of improving results, workplace culture and employee fulfilment.

Goleman breaks down EQ into five components:

1. Self-awareness

Emotions can affect team for a CEO. When Mr. Srivastava was newly appointed as a CEO for the newly acquired southern banking institute, he had his own methods and strategies which he felt highly about and we could see those traits in that first meeting he set up with all his employees in the bank. We could say this because of this statement he said, "I expect total dedication. If you cannot commit to our new vision and strategies, then this is not the right place for you. Commitment starts by being on time."

He had strictly scheduled the meeting, and when the turnover wasn't what he expected it to be, he got a little agitated with the employees and even ordered the staff to shut the door for late comers. This shows he was really affected with all the events; he wasn't comfortable with himself at that moment.

This could have been easily being resolved if Mr. Srivastava had been open towards staff on the first day. Then he could have implemented the punctuality as the basic requirements for the staff.

2. Self-Regulation

Mr. Srivastava's impulsive and irrational order of closing the door for employees who were late, made the people under him not to trust him. An emotionally charged environment is usually fraught with unresolved conflicts. It feels tense and distracting. The employees wouldn't have felt they could contribute without fear of reprimand. Calm in the face of adversity is not a natural response, or something you're born with. Self-regulation is a skill Mr. Srivastava need to practice and there are great rewards if he could master it. He became approachable, able to deal with conflict, create a nurturing environment and lead by reliable example.

3. Motivation

Goleman's third component refers to motivation for enjoyment, rather than money or a promotion.

By the case study, we could see that the newly acquired banking institution has a long standing reputation as a friendly institution with traditional values, and it prides itself

on its exemplary customer service. The current staff has even prepared a comprehensive package outlining the bank's vision and key customer success stories that demonstrate their commitment to exemplary service and low customer and employee turnover.

This all shows how they were motivated to work for the bank and are really happy working there. It has been disrupted when Mr. Manohar tried implementing his own strategies and methods which could have made employees demotivated to work there and had led to increase in turnover of about 25 percent and involuntary turnover was up 10 percent. Previous customer numbers were decreasing and customer complaints were increasing.

What is motivation for enjoyment? You need to:

- Understand why you are passionate about your job
- Realise how much you want to lead
- Have an optimistic outlook.

Even in the face of a bad day, you can still find the silver lining, feel energised to fix problems and determined to cheer the people around you onto the next success. It's self-motivation. You're doing it for you, to fulfil your personal goals and needs, to drive higher performance.

4. Empathy

If Mr. Srivastava can understand the emotions of others and relate to them, he could have seen problems from all perspectives and make objective decisions. Empathy defuses bias.

Mr. Srivastava met with the executive team and outlined the strategies, goals, numbers, and deadlines. A meeting was held with senior staff members responsible for reporting progress. Market growth numbers were up, and new business numbers were increasing. This shows how much he is goal oriented he is. The day he could have made everyone a little comfortable with him around the hospital with little empathy, instead of becoming a little intimidating

Being empathic means you're a good listener and interpreter, attuned to body language and expressions.

An empathic manager is considerate, balanced, and fair.

Applying empathy gives you a superpower. You can read what your employees need from you – when they need challenging, when they need constructive feedback, and when they need more training.

5. Social Skills

It's important to build a strong rapport with your team.

Not only is it part of good leadership, but it's also essential to boosting staff productivity and increasing loyalty.

Mr. Srivastava lack in social skills, which made him less approachable. When the quarter report result came, he asked for inputs and everybody were quite as they were not comfortable to speak in front of him about the situation.

Having solid social skills such as active listening, verbal communication, nonverbal communication, leadership and persuasiveness enables you to connect with your team.

By these factors we could say that Mr. Srivastava's emotional intelligence doesn't have that ten on ten rating and he lacks most of the features of an Emotionally intelligent person, therefore he need to up his EQ with the help of Goleman's model we discussed.
